

**Department of
Environmental
Conservation**

Climate Justice Working Group

Wednesday March 24, 2021

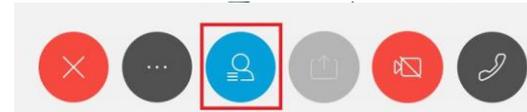

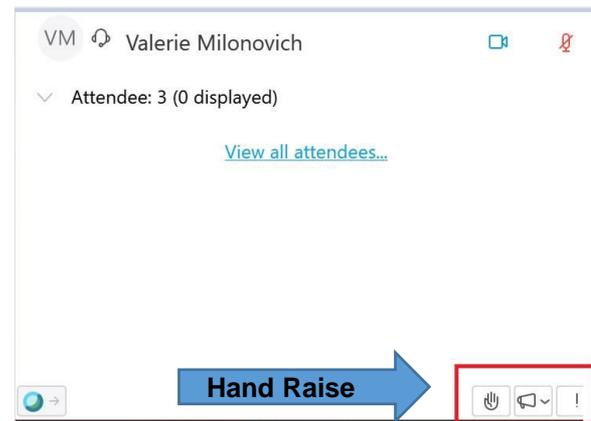

Meeting Procedures

Before beginning, a few reminders to ensure a smooth discussion:

- Working Group Members should be on mute if not speaking.
 - If using phone for audio, please tap the phone mute button.
 - If using computer for audio, please click the mute button on the computer screen (1st visual).
- Video is encouraged for Working Group members, particularly when speaking.
- In the event of a question or comment, please use the hand raise function (2nd visual). Click the participant panel button (3rd visual) for the hand raise function. Rosa or Alanah will call on members individually, at which time please unmute.

You'll see  when your microphone is muted

Welcome and Roll Call

Agenda

- > Welcome and Roll Call
- > Business Items
- > Data Status & Considerations for Inclusion
- > Scoring Approaches
- > Evaluating Scenarios
- > Groundtruthing
- > Next Steps

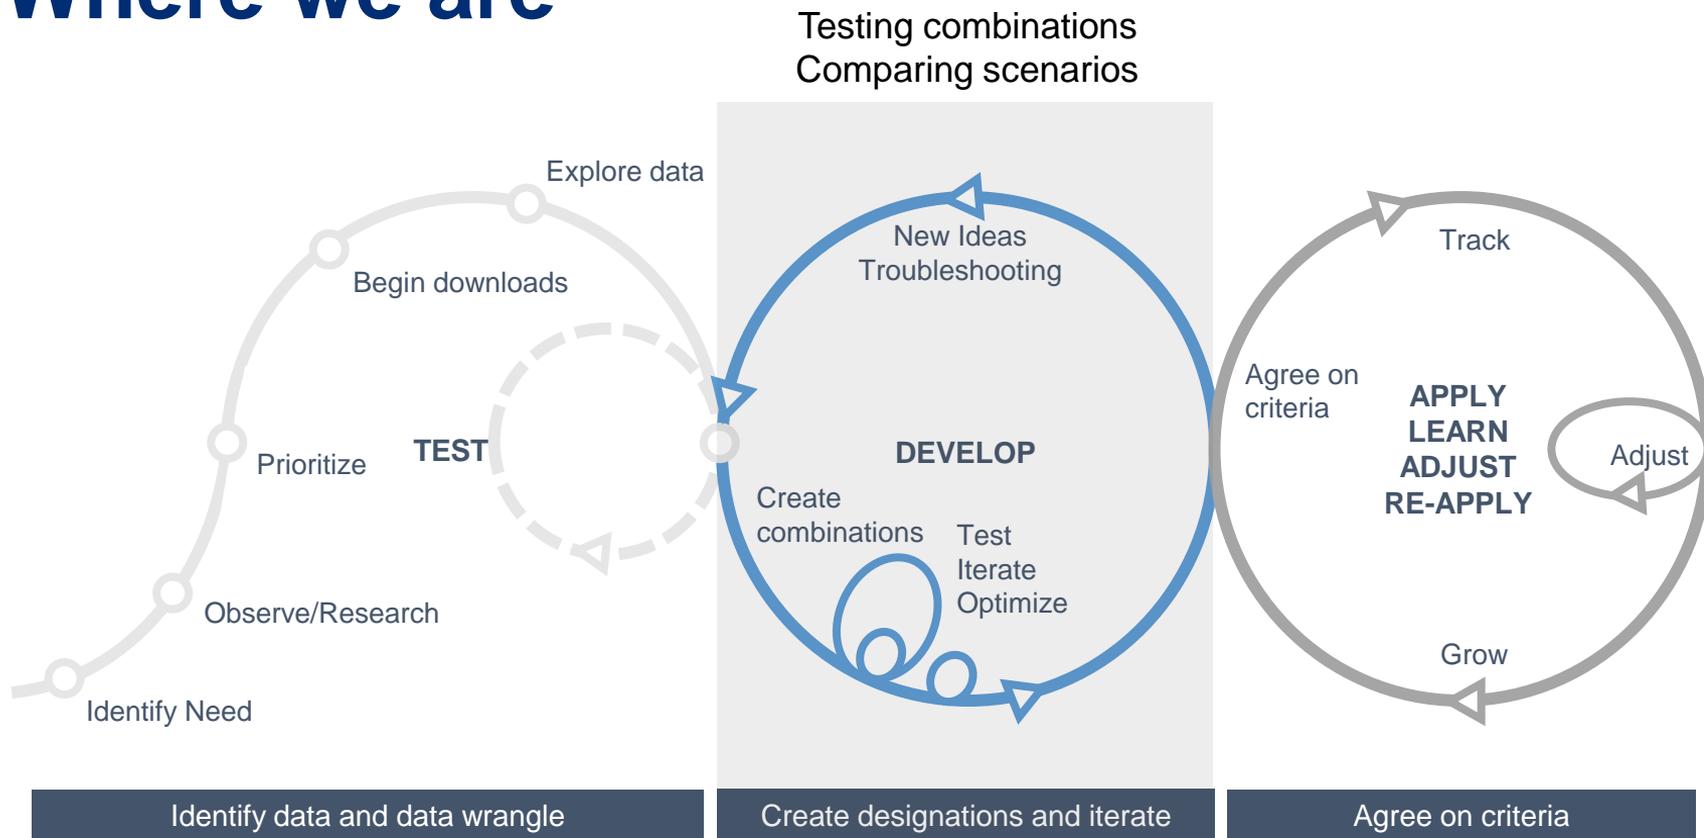

Business Items

- > List of additional follow-up questions for California
 - Post to SharePoint
 - Due in 1 week
- > Approval of Minutes

Where we are in
the process

Where we are

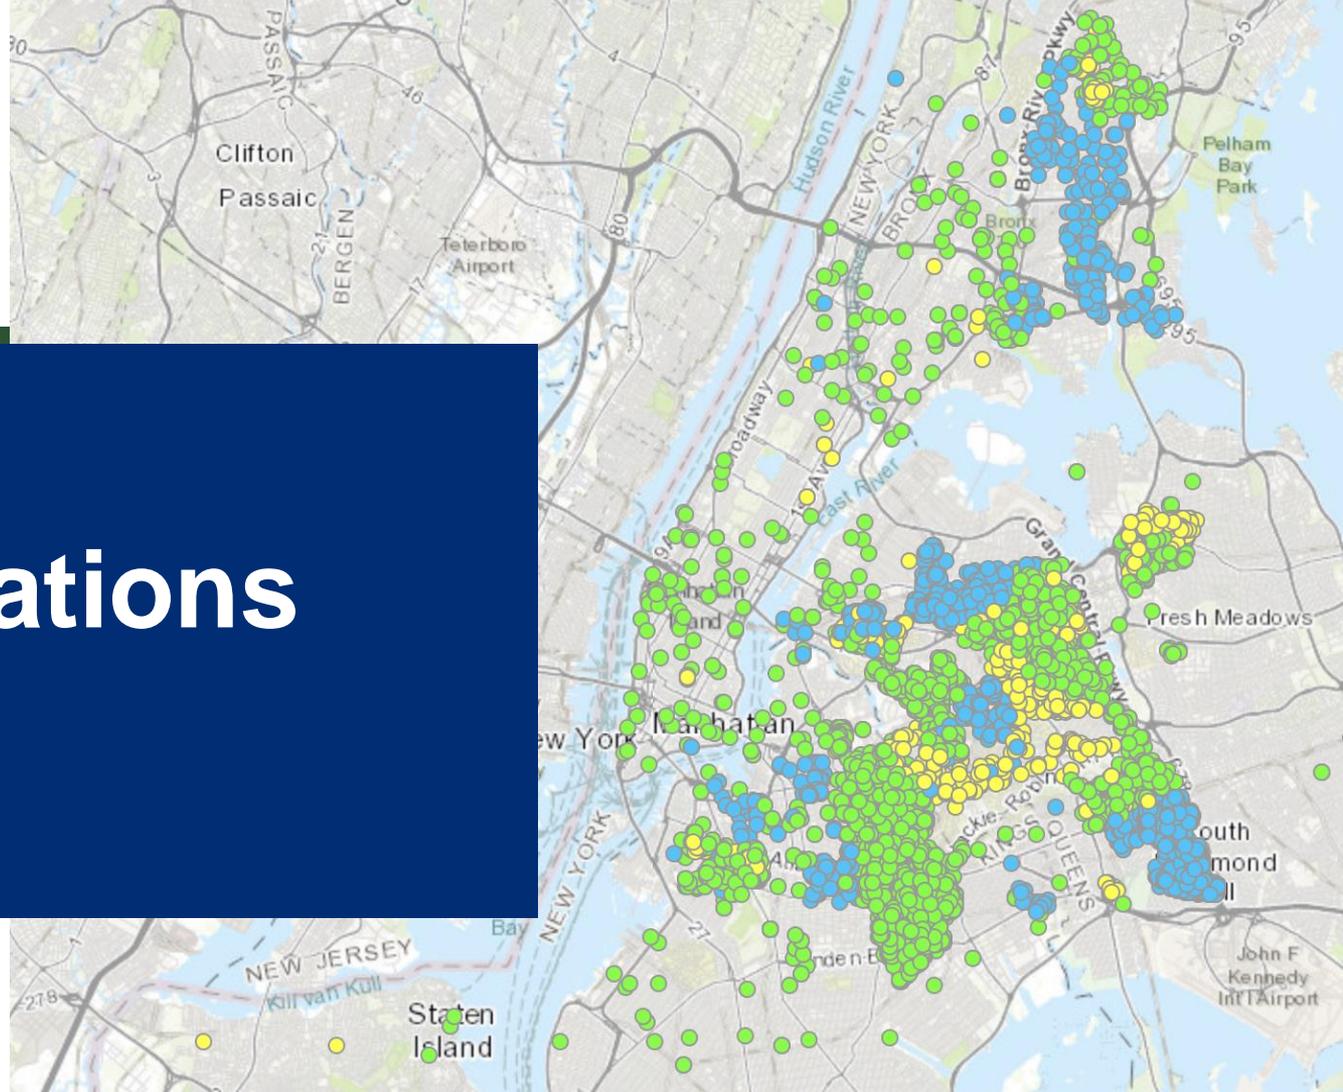

Currently we are...

1. Working on critical data pieces
2. Creating example combinations of criteria
3. Comparing & groundtruthing scenarios

Data Considerations

Threats vs. Vulnerabilities Framework

Threats

(Exposures, Burdens, Hazards,
Land Characteristics)

The conditions, burdens and risks people face in the built and natural environment

Pillar 1: Pollution burdens, air toxics

Pillar 2: Historical land use / hazardous facilities

Pillar 3: Coastal flood/storm risk, urban heat island, access/distance to services

Vulnerabilities

(Population Characteristics, Health Effects)

The resources and capacity people and communities have to respond or adapt

Pillar 1: Negative public health effects

Pillar 2: Population characteristics, including correlates with structural racism and historical discrimination

Pillar 3: Age, disability status, health insurance, internet, vehicles

Inclusion Considerations

We reviewed 56 indicators (a) on their own, and (b) in combination

Inclusion suggestions consider:

- Data coverage & granularity
- Data quality (e.g., measurement or sampling error)
- Modeled vs. directly-collected or measured data
- Correlations
- Technical guidance (e.g., DEC, DOH)

Still waiting for additional data/analysis that could replace current indicators

Threats (14 ready now; 11 pending)

Pillar 1 – Exposures & Hazards

Vehicle traffic density (EJScreen)
 PM2.5 (EJScreen)
 Benzene (NATA)
 Proximity to Regulated Management Plan (chemical) sites (EJScreen)
 Homes built before 1960 (lead paint) (EJScreen)
 Wastewater discharge (EJScreen)*

Pillar 2 – Land/Environment representing historical discrimination

Industrial/manufacturing/mining land use (HCR & PLUTO)
 Utility/waste land use (HCR & PLUTO)
 Proximity to NPL Superfund sites (EJScreen)*
 Proximity to Hazardous Waste sites (EJScreen)*

Pillar 3 – Climate Risks, Environmental Conditions, Access to Facilities

Susceptibility to Extreme Weather (NREL) *(replace later)*
 Developed land (NLCD)
 Agricultural land use (NLCD)
 Access to Home Internet (Census)

Considering for Inclusion

Waiting for Indicators

Proximity to Petroleum Product Terminals (DEC)
 Proximity to Power Plants
 Toxic release/waste leakage (DEC)
 Updated truck/traffic data

Proximity to Environmental Remediation Sites (DEC)
 Proximity to Active and Inactive Solid Waste Sites (DEC)

Coastal/storm surge risk (NYSDOS)
 Sea level rise
 Inland flooding risk
 Vegetative Cover
 Distance to hospitals/healthcare
 Summer temps (current or future)

**DEC staff identified limitations of several indicators and we can consider replacing them with “custom” indicators from DEC data if/when available.*

Vulnerabilities (18 ready now; 2 pending)

Pillar 1 – Negative Public Health Effects

Asthma Emergency
Department visits (DOH)
COPD Emergency
Department Visits (DOH)

Pillar 2 – Concentrations of people that historically experienced discrimination

Below 80% Area Median Income (HUD)
Below federal poverty line (Census)
Unemployment rate (Census)
Less than Bachelor's degree (Census)
Less than High School diploma (Census)
Black or African American (Census)
Hispanic/Latino(a) (Census)
Indigenous or Native American (Census)
Speak language other than English at home (Census)
Limited English Proficiency (Census)
Renters (Census)
Housing costs (rent burden, homeownership cost burden, ability to pay) (Census, NREL)

Pillar 3 – Vulnerability to Climate Risks

Health insurance (Census)
People with Disabilities (Census)
Single-parent households (Census)
Energy cost burden (DOE)

Considering
for Inclusion

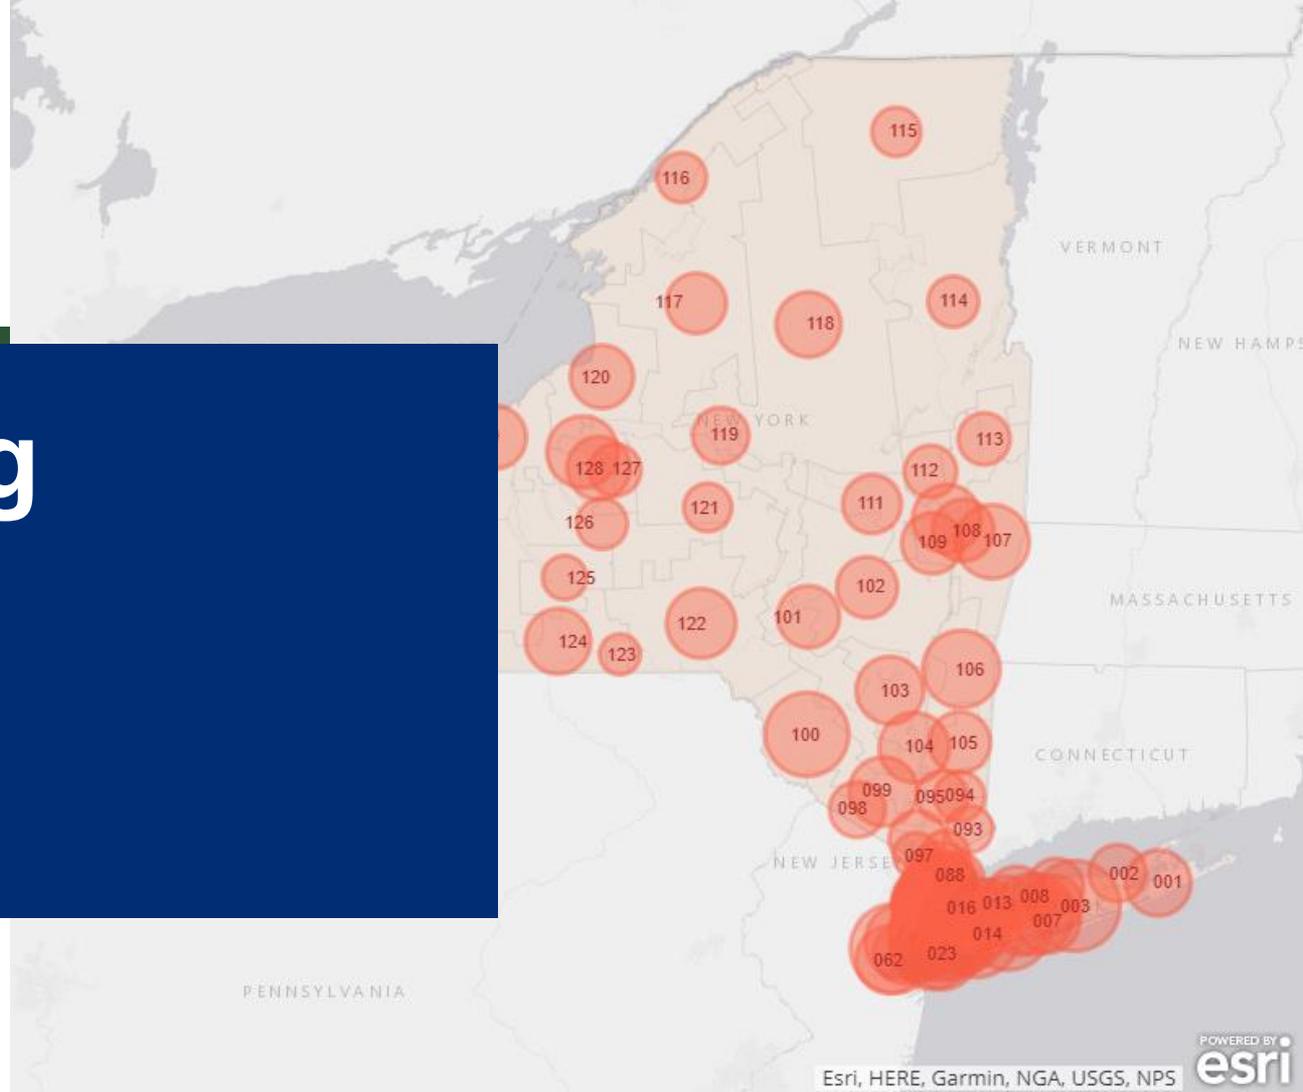

Heat-related illness or death?

Waiting for
Indicators

Premature deaths (DOH)
Strokes

Low birthweight births (DOH)

Combining Indicators

How do we combine component scores?

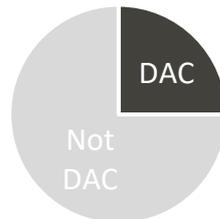

Bucket by
Threats and
Vulnerabilities

Options for
Combining
Components

Designation
(Top X% statewide
or regionally)

Example Scenarios

These early examples are meant to get us talking about what you see and what feels right to you.

Things we're trying to work through:

1. What is the “right” or fair regional mix of DACs?

Do we hold a similar proportion of DACs for NYC versus the rest of the state? (Regional division versus statewide)

2. How important is income compared to other factors?

Do we include income in as an indicator like all the others, or should it carry more weight?

		Scenario A (regional restriction)		Scenario B (no restriction)		Statewide Proportions
Proportion of State Designated	Total DAC	1,185		1,209		4,780*
	As % of State	25%		25%		100%

Share of DACs by Region	Region	Scenario A (regional restriction)		Scenario B (no restriction)		Statewide Proportions
		Pct	Bar	Pct	Bar	
	New York City	43%		72%		44%
	Long Island	7%		3%		12%
	Mid-Hudson	13%		7%		11%
	Western NY	10%		5%		7%
	Finger Lakes	7%		2%		6%
	Capital Region	6%		2%		6%
	Central NY	6%		3%		4.50%
	Southern Tier	4%		2%		3.50%
	Mohawk Valley	4%		1%		3.00%
	North Country	1%		1%		2.20%

Income and BIPOC	Scenario A (regional restriction)		Scenario B (no restriction)		Statewide Proportions
	Pct	Bar	Pct	Bar	
	Pct that are HUD QCTs	87%		85%	
Lower Income Percentile (higher = lower income)	68		67		50
BIPOC Percentile (higher = more BIPOC)	64		73		50

Regional versus Statewide

-- Early Data --
numbers will shift with data additions/updates

Groundtruthing

Your list of DACs & Not DACs

Go to https://public.tableau.com/views/NYCensustracts/NYMap?:language=en&:display_count=y&:origin=viz_share_link

Hover over the map to get the census tract name – it's a long number

Write down the following:

- Tracts you think should be DACs
- Tracts you think should NOT be DACs
- Reason why it's a DAC or not
- Send email to Rosa and Alex with your thoughts

Email Rosa & Alex

Email Rosa & Alex:

- Tracts you think should be DACs
- Tracts you think should NOT be DACs
- Reasoning why – phrase or sentence

Aim for 4-10 but anything you can give us would be great

Tract	DAC or not?	Why?
36065023000 (City)	Yes	(phrase or sentence)
36065025600 (Augusta)	No	(phrase or sentence)
36065027300 (Oneida)	Yes	(phrase or sentence)

Updates

CalEnviroScreen 4.0 Workshops

[San Joaquin Valley](#)

Wednesday, April 7
5:30-7:00 PM

[San Diego](#)

Thursday, April 8
5:30-7:00 PM

[Greater Los Angeles](#)

Monday, April 12
5:30-7:00 PM

[Statewide](#)

Wednesday, April 14
11:00 AM-12:30 PM

[Imperial and Coachella Valleys](#)

Monday, April 19
5:30-7:00 PM

[San Francisco Bay Area](#)

Tuesday, April 20
5:30-7:00 PM

Six virtual public workshops to collect regional input

The [public comment period](#) is open from February 22 to April 30, 2021.

OEHHA will review the comments and consider revisions before releasing a final version of CalEnviroScreen 4.0 in summer 2021

Meeting registration:
