

New York State

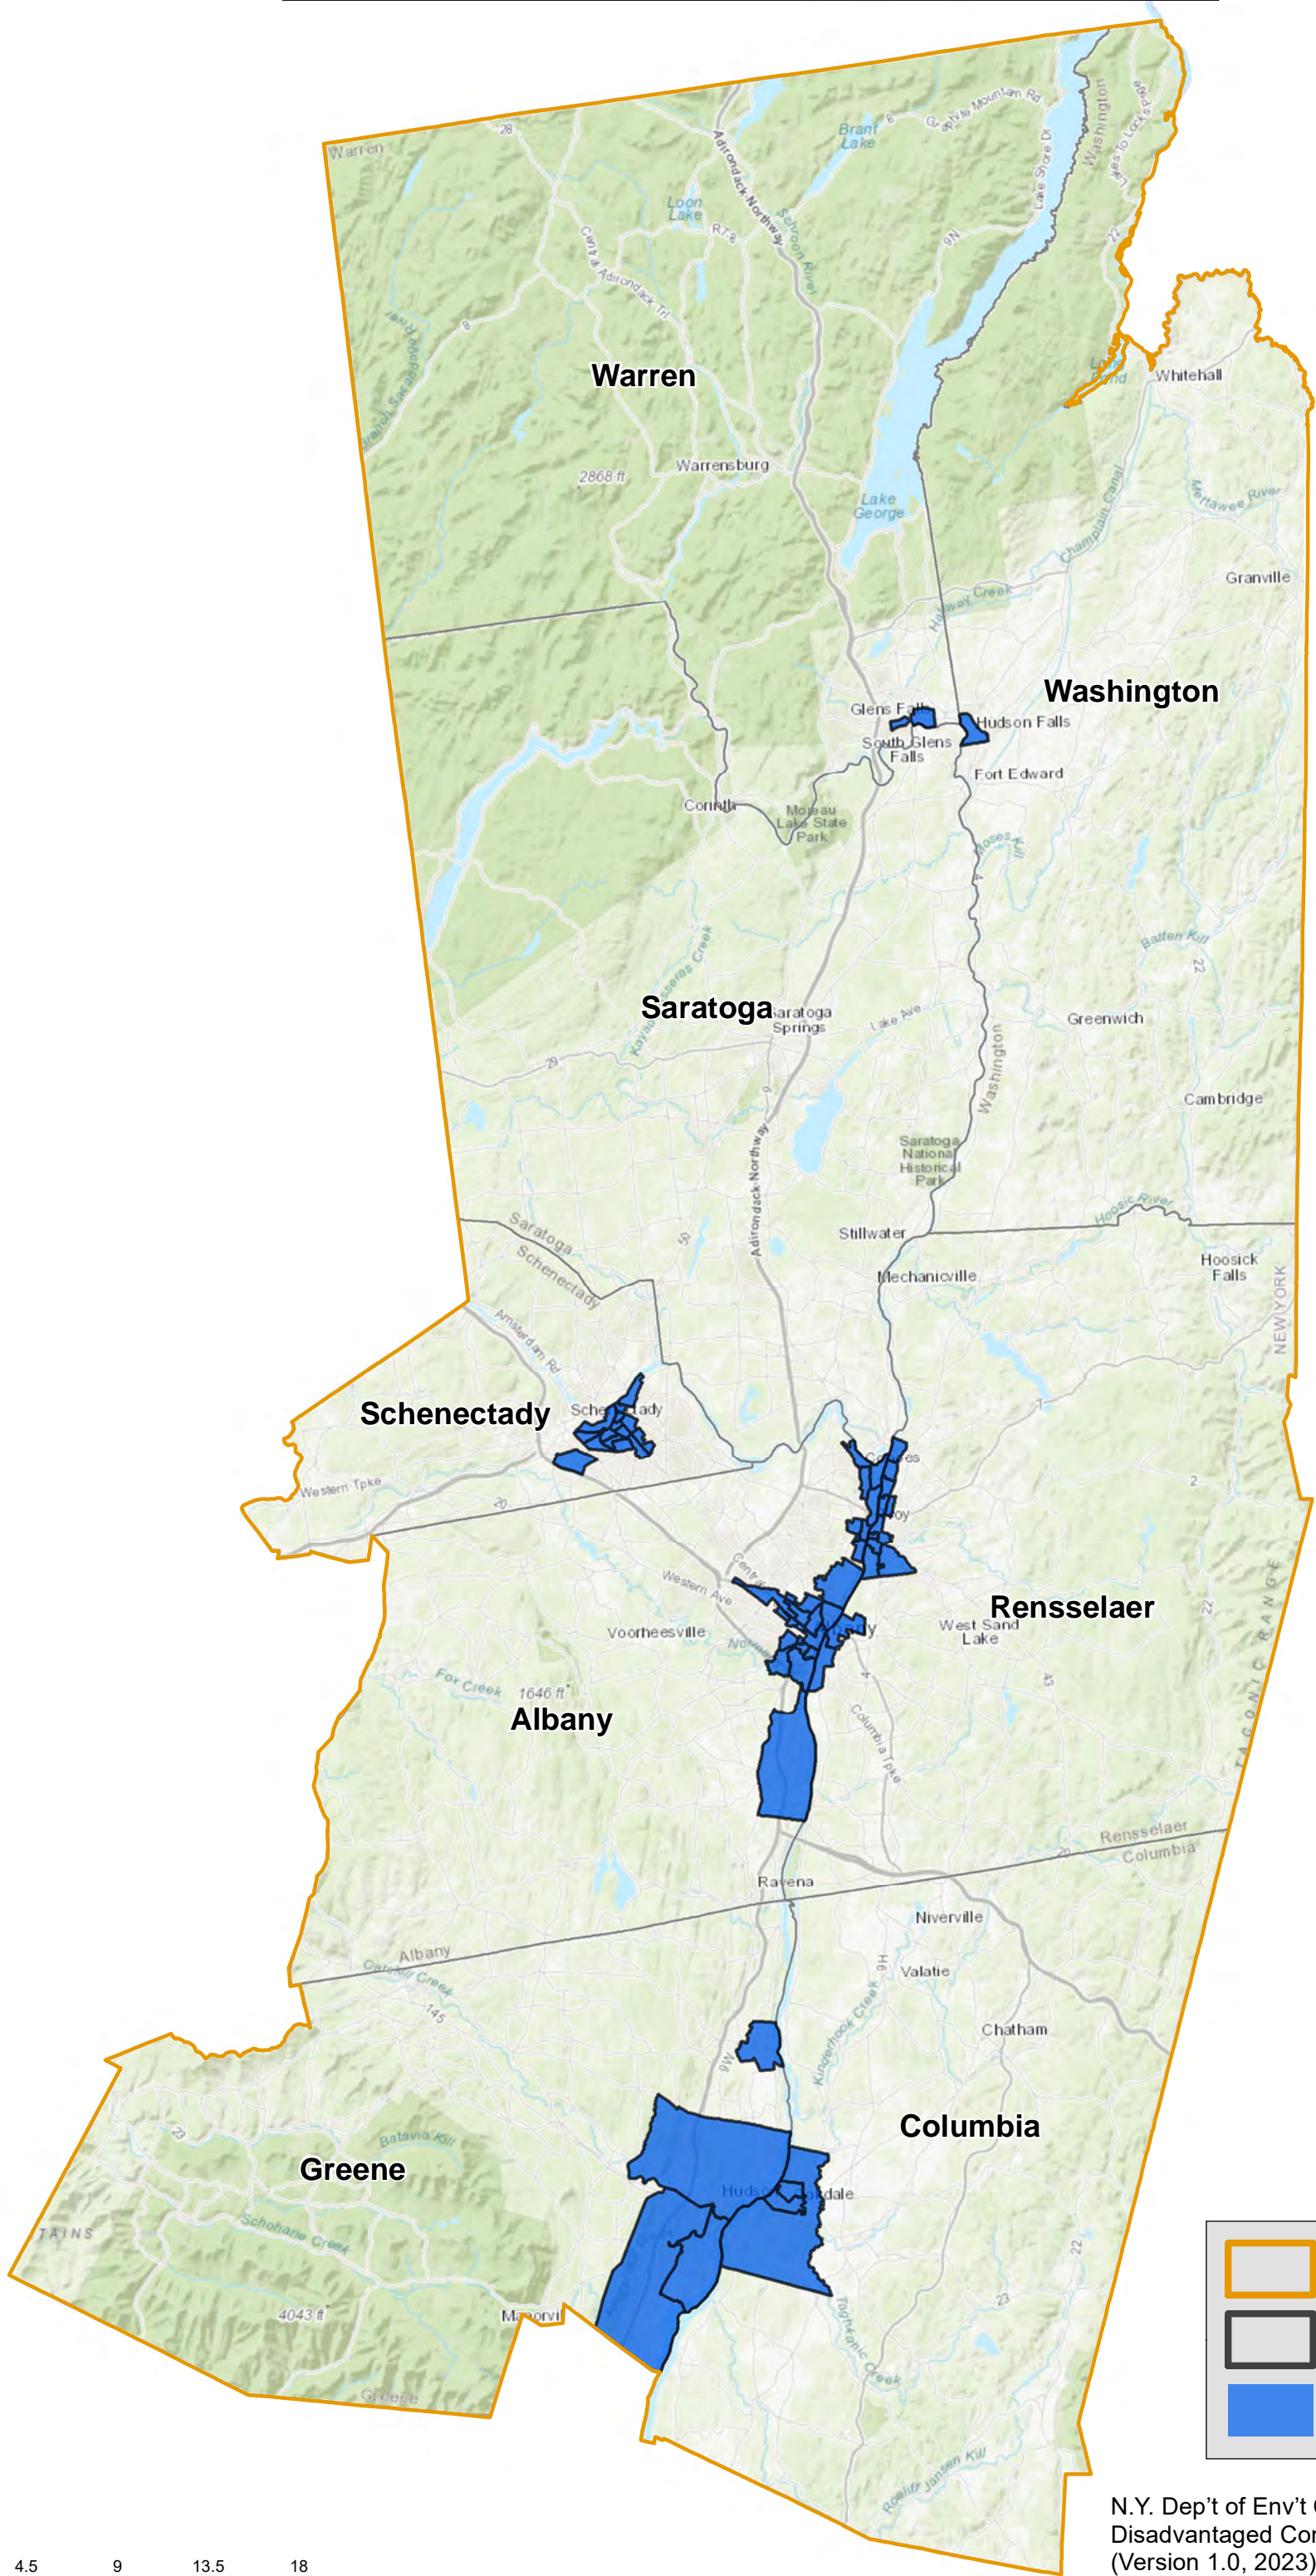

Disadvantaged Communities Criteria Version 1.0

Maps

The New York State Climate Justice Working Group, which consists of representatives from environmental justice groups across the State and representatives of several State agencies, under the New York State Department of Environmental Conservation, voted on March 27, 2023 on final criteria to identify disadvantaged communities to help guide the implementation of the State's nation-leading Climate Leadership and Community Protection Act.

This document includes maps of the disadvantaged communities. For ease of viewing, this document includes a map for each Regional Economic Development Council (REDC) region throughout New York State. REDC's were developed by New York State to support and streamline local economic development opportunities. There are a total of 10 REDC regions in New York State. Disadvantaged communities are defined at the census tract level per the criteria and nest within the REDC regions for ease of viewing. The maps within this document show a single map by REDC region and include disadvantaged communities census tracts outlined in black. For further information about New York State's disadvantaged communities criteria visit <https://climate.ny.gov/Resources/Disadvantaged-Communities-Criteria>.
